Bosch Sound Projectors

- **Exceptional styling**
- **Four highly versatile models**
- **Superb reproduction of both music and speech**
- **Built to handle continuous, heavy use**
- **EVAC Compliant**

Elegant style and superior sound

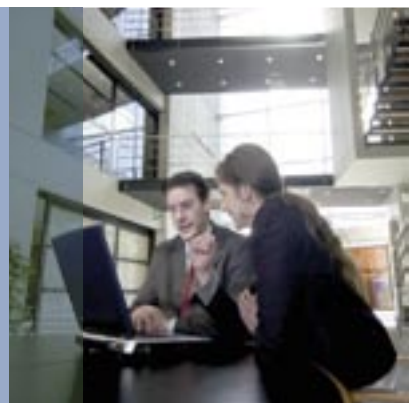

Bosch sound projectors have an elegant visual design that blends easily into a vast range of different interiors. Completely invisible wiring and the simplicity of the case design make them very easy to customize. Top-notch styling and superior projecting power combine to make this series the ideal choice for office buildings, shopping malls, airports, or any other complex indoor or outdoor environment.

Versatility and power

The Bosch sound projectors' optimal acoustic shape and top-of-the-line components allow them to produce a remarkable range of low and high tones equally well. This means great-sounding music and perfectly intelligible speech, projected clearly at high volumes and over long distances. These qualities are rarely found in one and the same loudspeaker solution.

Total ease of installation

Bosch sound projectors were specially designed for easy and fast installation in places where other speakers can't go.

Loop-through cabling ability ensures fast installation and the built-in extra safety cable acts as a 'third hand' for installation professionals. Once attached, they can be aimed with the precision of a spotlight to localize sound exactly where it's needed.

Long-term endurance

The Bosch sound projectors are incredibly tough. An extensive series of tests confirms their ability to withstand environmental and powering extremes. They even can withstand two times their rated power for short durations.

When visual appeal has to be matched by absolute reliability and superb sound quality, the Bosch Sound Projector is the ideal choice.
